Technical Skills

Languages: Java, JavaScript, TypeScript, Python
Frontend: React.js, Redux, Tailwind CSS, Material UI, BootStrap, React Native, Next.js
Backend: Node.js, Express.js, Microservices, OpenAI SDK
Databases : MongoDB, PostgreSQL, Redis, AWS S3 | **CS:** DSA, OOP, OS, DBMS, CN, C/C++
Devops & Tools: Git, GitLab, Postman, Figma, Thunder Client, Docker, Kubernetes, Jenkins, Kafka, Ngnix, Firebase | **Learning:** System Design, Generative AI

Experience

Software Development Engineer Jul 2026 – Sep 2026
Xenotix Labs (Noida)

- Architected the backend for Aaspassko, a global platform designed to scale to an estimated 3M+ users, with a sharded database and a role-based access control (RBAC) model.
- Developed 70+ backend APIs, including authentication and authorization modules, and shipped three React Native apps (Vendor, Team, User) in a two-person team.
- Built the Next.js admin panel for vendor KYC verification, product approvals, and tracking of vendor sales and orders.

Software Development Engineer May 2025 – Dec 2025
BusinessCurative (New Delhi) Live Project

- Built and shipped a production MERN eCommerce platform with a role-based architecture (Admin, Seller, Customer).
- Implemented backend modules (authentication/authorization, seller onboarding, product listing, approvals, cart, orders) with RESTful APIs and an optimized MongoDB schema.
- Led deployment, managing CI/CD pipelines and production release using GitLab.

Projects

Agentic Honeypot System Live | Tester | GitHub

- Engineered an autonomous multi-agent honeypot (OpenAI SDK, GPT-4o-mini) to detect, classify (10+ scam types), and engage scammers, with an endpoint-driven architecture and custom testing interface.
- Developed a regex-based parser to extract phone numbers, UPI IDs, bank details, and malicious URLs into structured JSON.
- Achieved 99.3% precision, 97.2% recall, 1.2s latency, 99.2% webhook success, $\sim$ \$0.003 cost/session.

Securing P2P Communication with Deepfake Detection Research Paper | GitHub

- Developed real-time P2P video calling (Node.js, WebRTC, WebSockets) with a Flask-based inference API for live deepfake detection.
- Integrated face-swap deepfake simulation and built detection using CNNs + ViT (PyTorch, NumPy).
- Achieved 98.3% accuracy, 98.9% precision, 99.7% F1-score and won hackathon.

Education

Mahatma Gandhi Mission College of Engineering and Technology, Noida Oct 2023 – Jul 2027
Bachelor of Technology in Computer Science and Engineering CGPA: 8.07

Achievements

- Grand Finalist at India AI Impact Summit 2026 Buildathon (HCL GUVI) Certificate
- Winner at IPEC-TBI Hackathon at Bharat Shiksha Expo 2025 Certificate
- 1st Runner-up at CDAC, Noida Hackathon
- Research Paper: *Securing Peer-to-Peer Communication with Deepfake Detection*
- GDG on-campus Co-Lead; Google Women Techmakers Ambassador
- OSCode MGMCoET Lead, OSCode Delhi-NCR Community Manager, Technovation Mentor
